

## BlackHawk Kestrel Pro Weight-Shift Arm Retention Strap Guide

This page will guide you through the proper installation of the Kestrel Pro Weight-Shift Retention Strap. This strap **MUST** be installed as shown, using only BlackHawk approved parts. If you have any questions whatsoever, please contact us before operating this equipment.

The picture above shows the (2) Retention Straps and Stainless Steel Maillons provided. In the unlikely event of a bolt failure in the pivot arm, these straps are designed to effectively hold the arm within approximately 2.5 inches of where it was secured.

This diagram shows the proper installation of the Kestrel Pro Weight-Shift Retention Strap. For a video demonstration of the strap installation, please visit [BlackHawkParamotor.Com](http://BlackHawkParamotor.Com). Under the “Paramotors” tab of the Homepage menu, go to “Cages,” then hover the mouse over “Kestrel Cage” and you will see the “Retention Strap Installation” link. If you would like to speak to someone directly, please call us at (209) 786-7899. You can also Email us at [Info@BlackHawkParamotor.Com](mailto:Info@BlackHawkParamotor.Com)
